Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-19, drawn to storage control for executing switch commands where a next switch command of a command set is activated at a predetermined time, indicated by an information item, after a previous switch command, classified in class 711, subclass 101.
- II. Claims 20-26, drawn to memory controller system with register storing memory control commands, intermediate memory storing the current memory command, and switch unit transmitting memory control commands based upon these and access commands received from a host, classified in class 711, subclass 101.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a storage control for executing switch commands for a command set which is for a storage type, which activates a current switch command at a predetermined time later than the preceeding switch command, the time indicated by an information item allocated to the storage cell, without regard to whether a register is programmable depending upon memory type, or to having an intermediate memory storing a current memory command, or to

having a switch unit that transmits memory control commands as a function of order of commands in the register, contents of the intermediate memory, and access commands from the host. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

4. During a telephone conversation with Gregory Schivley on September 2, 2004 a provisional election was made without traverse to prosecute the invention of Group I, claims 1-19. Claims 20-26 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

EXAMINER'S AMENDMENT

5. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Gregory Schivley on September 2, 2004.

The application has been amended as follows:

In the claims:

Cancel claims 20-26.

Allowable Subject Matter

6. Claims 1-19 are allowed.
